**Scenic Cabins.
Focus on
the perspective.**

**The clear-cut choice
for the elevator with
a view.**

Mitsulift scenic cabins always focus on the view.

Limitless vertical encounters on the horizon. Our scenic cabins will define your visual experience.

Using secure clear laminated glass, passengers are immersed in scenery that ultimately stimulates their senses.

Our scenic cabins are available in two set styles: Glass Framed or Glass Frameless – giving customers the choice to match the building's character and identity.

**Interior–exterior.
Elevating the body,
and certainly
the soul too.**

**Visibility, space,
light and emotion.**

Sheets of secure clear laminated glass are laser cut and assembled to guarantee seamless joints. This gives the impression of total open space from the inside out. The Car Operating Panel, handrails and other parts are crafted in plain stainless steel with hairline finishing or are available in painted steel covering all RAL color ranges.

All our scenic cabins are in strict compliance with the requirements of EN81 standards.

Car Operating Panel. As discreet as it gets.

Smart placement with no obstruction.

The Car Operating Panel is integrated on either the front or side wall of the cabin.

Scenic cabins are compatible with both Mitsubishi and mlift ranges of elevator motors, operating systems and variable components.

The Mitsubishi option offers Car Operating Panels made either from plain stainless steel with hairline finishing or painted steel covering all RAL color ranges. Hall Operating Panels are solely available in plain stainless steel with hairline finishing. The Car Operating Panel is placed on either the front or the side wall of the cabin.

The mlift option offers Car and Hall Operating Panels in black or white. They are made to match the design and color of the steel aspects or elements of the cabin. The Car Operating Panel is placed solely on the front wall of the cabin.

**Handrails.
Sturdy
balustrades.**

**The elegant comfort
of your moving terrace.**

Graceful handrail design shaped simply to create visual harmony for sturdy support inside the cabin.

Every detail of our handrail combines simplicity of design with functionality of use. Available in either plain stainless steel or painted steel. The ergonomic design always ensures a solid, comfortable and secure grip.

Placed towards the front wall of the cabin and extending to the sides, the handrail is fixed and firmly legged, allowing passengers to confidently enjoy the view.

Our handrails are available in two style variants – either rounded or rectangular in design.

Scenic Cabins
