D/N1 lift cabin, by David/Nicolas, for Mitsulift

This modular lift cabin wouldn't look out of place in a Wes Anderson production. Created by Lebanese design studio David/Nicolas for local manufacturer Mitsulift, the D/N1 features diffused top lighting, a striated upper section in natural oak, a laminate lower section, available in four statement colours (night blue, grenadine red, pepper grey or basil green), and

travertine flooring. A round, steel-framed mirror and oak handrail lend geometric contrast and heighten the design's cinematic qualities. The pleasing combination of unconventional design and fine craftsmanship means that, rather than being an interstitial space, the lift cabin can become a statement piece within a domestic interior. ✦ davidandnicolas.com; mitsulift.com
